About Me

I am a junior front-end developer. I can build a responsive and user-friendly websites. I currently build a website by using HTML, CSS, Java Script and Bootstrap. I can also use Tailwind CSS, Python and MySQL, and I am currently learning Typescript. I enjoy coding and learning about user experience(UX) and user interface(UI) design.

Skills

- [HTML](#)
- [CSS](#)
- [JavaScript](#)
- Python
- MySQL
- Tailwind CSS
- [Bootstrap](#)

2018-2020
- **Web Development**
[Digital Skills Institute]
June - July (2025)
- **Python Programming**
[Digital Skills Institute]
March - May (2026)

Projects

- [Personal Portfolio Website](#)

At first, I wasn't sure what kind of project should I create for my portfolio. But when I designed my CV with Canva. I want a place to connect my social accounts and showcase my projects. That's why I decided to build my own portfolio website. In this website, I mainly uses HTML, CSS,and JS to show my front-end skills. I also included links to my other projects, including a Bootstrap I am currently working on Tailwind CSS project to continue improving my skills.

- [Bookstore Library](#)

I built this project for my class' final project. In this project, I used Python and MySQL to manage book inventory and author records. It supports CRUD operations, including viewing, adding, searching, updating, deleting books,as well as viewing authors. MySQL is used to store and manage the data. This project improved data organization and reduced manual record-keeping for bookstore staff.

Language

- English (B1 intermediate)
- Chinese (Basic)
- Burmese (Native)
